

School-Level ELA Proficiency: Non-ED vs. ED (DPI Economic Status)
Wisconsin Public Schools — Forward Exam Primary Years (2015-2023)

Note: Each point is one school × district. Proficiency is enrollment-weighted across grades 3-8 and primary years (excludes 2019-20 and 2020-21). A school appears only if both economic-status proficiency rates are non-suppressed. DPI Unknown economic-status cells are excluded. Dashed line = parity (no ED-non-ED gap at the school level). This cut is not nested with race; it describes poverty status, not racial composition.

Pearson correlations (non-ED vs. ED proficiency):
(a) Overall $r=0.740$ ($n=1,623$); (b) MMSD $r=0.694$ ($n=41$)
(c) Milwaukee $r=0.871$ ($n=92$); (d) Other $r=0.737$ ($n=1,490$)
